

Ruhani Bhatia

☎ +91 81464-23150 ✉ ruhanib2003@gmail.com [LinkedIn](#) [GitHub](#)

Skills

Languages: Python, C++, JavaScript, SQL
Backend: Node.js, Express.js, Flask, REST APIs
Frontend: React.js, HTML, CSS
Databases: MySQL, MongoDB, SQLite
ML & GenAI: scikit-learn, TensorFlow, NLP, Stable Diffusion, ControlNet
Core CS: Data Structures, Algorithms, Object-Oriented Programming
Tools: Git, GitHub, Postman, Jupyter Notebook

Work Experience

Full Stack Developer Intern Jan 2026 – Present

SK Info Techies

- Developed modular **React components** improving responsiveness across core modules.
- Integrated **REST APIs** for efficient frontend–backend communication.
- Built backend services with **Node.js and Express.js** for API and database operations.
- Debugged UI and API issues improving overall application performance.

Web Development Intern

Jun – Jul 2025

Bhagat Puran Singh School for the Deaf, Amritsar

- Developed a **Sign Language Dictionary platform** containing **1500+ entries**.
- Designed and optimized **10+ responsive web interfaces** using HTML, CSS, and JavaScript.
- Increased user engagement by **40%** through improved interface design and usability.

Summer Research Intern

Jun – Aug 2024

Thapar Institute of Engineering and Technology

- Built Python pipelines to preprocess and analyze **19-channel EEG datasets**.
- Applied feature extraction and ML techniques achieving **95.77% classification accuracy**.
- Optimized preprocessing workflows improving signal quality and model performance.

Projects

Fintrack AI – GenAI Budget Tracker

[GitHub](#)

- Developed a **Flask-based backend** managing **500+ financial transactions**.
- Implemented automated expense categorization and financial report generation.

SpendWise – Smart Shopping & Budget Management App

[GitHub](#)

- Built modular **React components** for dynamic expense tracking.
- Managed **100+ transaction records** with real-time UI updates.

GenAI-Based Historical Image Restoration

[GitHub](#)

- Implemented a **Generative AI pipeline** using **Stable Diffusion and ControlNet**.
- Restored **30+ degraded historical images** with optimized inference under **5 seconds**.

NGO Resource Management System

[GitHub](#)

- Designed a **MySQL relational database** managing **200+ organizational records**.
- Automated reporting workflows reducing manual processing by **50%**.

Hindi–English News Summarizer

[GitHub](#)

- Built a **transformer-based NLP pipeline** processing **200+ multilingual articles**.
- Generated concise summaries using optimized tokenization and inference.

Education

Thapar Institute of Engineering and Technology

2022 – 2026

B.E. Electronics and Computer Engineering — CGPA: 8.00

Certifications

NVIDIA – Accelerating End-to-End Data Science Workflows

[Certification Link](#)
