Summary

Software Engineer and Full Stack Developer with hands-on experience in building responsive web applications, REST APIs, authentication workflows, and database-driven systems. Skilled in React.js, Node.js, Express.js, Flask, MongoDB, MySQL, and SQLite. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and full-stack application architecture.

Skills

Languages: Python, C++, JavaScript, SQL

Frontend: React.js, HTML, CSS, Streamlit

Backend: Node.js, Express.js, Flask, REST APIs

Databases: MongoDB, MySQL, SQLite, Mongoose

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems

Tools: Git, GitHub, Postman, Jupyter Notebook, Google Colab, VS Code

Work Experience

Full Stack Software Developer Intern

Jan 2026

SK Info Techies

- Completed 3 development tasks using React.js, Node.js, Express.js, MongoDB, and Mongoose.
- Created 10+ frontend components and responsive interfaces for scalable application layouts.
- Integrated 5+ REST API modules with frontend workflows, database connectivity, and testing.
- Applied 5+ authentication workflows using JWT, bcrypt, OTP, Google OAuth, and protected routes.
- Enhanced debugging, state management, code organization, error handling, and communication skills.

Web Development Intern

Jun 2025 – Jul 2025

Bhagat Puran Singh School for the Deaf, Amritsar

- Built an accessible Sign Language Dictionary with 1,500+ sign entries for learning support.
- Designed 10+ responsive interfaces with structured content, search functionality, and navigation.
- Improved user engagement by 40% through UI/UX enhancements and frontend optimization.

Summer Research Intern

Jun 2024 – Aug 2024

Thapar Institute of Engineering and Technology

- Prepared EEG preprocessing and feature extraction pipelines using Python and signal processing techniques.
- Collaborated with a research team on FCNN model training for ADHD, ASD, and control classification.
- Achieved 95.77% classification accuracy using a Feedforward Fully Connected Neural Network.

Projects

SpendWise – Full-Stack Shopping & Budget Management System

[GitHub](#)

- Engineered a full-stack shopping app using React.js, Node.js, Express.js, MongoDB, and Mongoose.
- Created 4+ CRUD modules for lists, categories, units, and products with REST APIs.
- Integrated 5+ auth workflows including JWT, OTP verification, password reset, and Google OAuth.
- Added active-list handling, category-wise totals, budget tracking, duplicate checks, and responsive dashboards.

Fintrack AI – Personal Finance & Budget Tracker

[GitHub](#)

- Designed a finance tracker to record income, expenses, and 100+ transaction entries.
- Built a Flask backend with SQLite and Streamlit frontend for transaction management.
- Added 3+ features including expense analysis, monthly summaries, and AI-based budget tips.

NGO Resource Management System

[GitHub](#)

- Created a database-driven system to manage 3+ modules: volunteers, donations, and inventory.
- Structured MySQL tables, stored procedures, and 4 SQL scripts using Python connectivity.
- Developed a Streamlit interface with registration, stock updates, search, and filters.

Education & Certifications

Thapar Institute of Engineering and Technology

2022 – 2026

B.E. in Electronics and Computer Engineering — CGPA: 8.00

NVIDIA – Accelerating End-to-End Data Science Workflows

[Certificate](#)
